Summary

In-depth Full Stack Developer with a robust skill set encompassing both front-end and back-end technologies. Proficient in designing and implementing responsive, user-friendly web applications using HTML, CSS, and JavaScript. Well-versed in modern front-end libraries and frameworks such as React, Vue, Angular, ensuring a seamless and engaging user experience.

On the back end, experienced with server-side technologies including Node.js, Express.js, Ruby on Rails, Go, Django/Flask, Laravel and relational/non-relational databases like MySQL and MongoDB. Skilled in crafting scalable, secure, and efficient APIs that facilitate smooth data flow between the front and back end.

Adept at translating project requirements into technical specifications and developing solutions that align with business objectives. Successful track record of delivering high-quality software within project timelines, utilizing version control systems like Git for collaborative development.

Demonstrated ability to work in cross-functional teams, effectively communicating complex technical concepts to non-technical stakeholders. Proactive in identifying and resolving issues, and passionate about continuous learning to stay abreast of the latest industry trends and emerging technologies.

Excels in agile development environments, adapting quickly to evolving project needs.

Committed to writing clean, maintainable code and implementing best practices to ensure the long-term success and scalability of applications.

Best Regards

Experience

Jan 2024 – CURRENT

Senior Web Developer | CodSoft

Front end development including: mobile web views, bug fixing, new features, engineering for responsive single page applications using modern frameworks integrating with back end services.
